Redmond, Washington, USA US CITIZEN

SUMMARY

Data Engineer at Boeing Defense, Space & Security (via Quest Global), currently ramping up on the BDS data platform with focus on onboarding Oracle, MSSQL, and PostgreSQL sources through an internal ETL framework. Prior production experience optimizing 20+ AWS Glue jobs (reducing execution time by 30%) at Lotus Labs and delivering Tableau/Power BI reporting at Apple and ExcelR. Self-directed depth on AWS data engineering through an end-to-end streaming lakehouse (MSK Serverless to Glue Streaming to Apache Iceberg to MWAA to Athena, infrastructure-as-code via Terraform).

EDUCATION

Bachelor Of Engineering (Hons.), Electronics And Instrumentation

BITS Pilani

01/2020 - 05/2024 Hyderabad, India
• Minor: Finance

EXPERIENCE

Data Engineer

Quest Global - Boeing BDS (Contract)

01/2026 - Present Redmond, WA (Hybrid)
• Mapping current source-onboarding patterns across Oracle, SQL Server, and PostgreSQL systems in preparation for pipeline contributions.
• Learning the team's internal ETL framework, including ingestion patterns, transformation conventions, and deployment workflow, in preparation for contributing to source-onboarding pipelines.
• Building hands-on proficiency through a self-directed AWS streaming lakehouse project to accelerate future contributions to the BDS platform.

Junior Software Engineer

Luv Health Inc

11/2025 - 01/2026 USA (Remote)
Internship
• Built RESTful APIs in FastAPI with JWT authentication, ABAC, and session handling for secure user workflows
• Applied full SDLC across requirements, design, testing, and deployment
• Authored test scenarios for authentication and file-storage workflows

QA Analyst

Apple

09/2025 - 11/2025 California, USA
Contract
• Boosted lab efficiency by 25% through optimized layout and QA station coordination
• Built three Tableau dashboards automating monthly reporting on product-testing metrics
• Reduced operational downtime by 15% via inventory analysis of 500+ components
• Expanded test coverage by 40% through structured data tracking and validation reporting

Junior Data Engineer

Lotus Labs Inc

10/2024 - 02/2025 Arizona, USA
Internship
• Developed and optimized 20+ AWS Glue jobs with PySpark transformations, processing thousands of records daily and reducing execution time by 30%
• Automated file transfers from 5+ servers to Amazon S3 and Snowflake via Snowpipe, improving ingestion efficiency
• Used AWS Glue to extract structured and unstructured data, with cleaning and preprocessing in Python/SQL
• Improved data accuracy by 15% by establishing AWS account connectivity for downstream analysis

SKILLS

Cloud / Data

AWS Lambda	Microsoft SQL Server	
PostgreSQL	Apache Kafka	AWS Glue
Apache Iceberg	MWAA	Airflow
PySpark	Amazon S3	Snowflake
Deep Learning	API Gateway	
AWS Redshift	Azure Data Factory	Oracle
Amazon Athena	Databricks	

BI / Reporting

Tableau	PowerBI	Power Query	DAX
Excel			

Programming / Analytics

Python	Node.js	NumPy	TensorFlow
REST API	JWT	Beautifulsoup	EDA
SQL			

DevOps & Collaboration

Git	Docker	Kubernetes	Jira
Terraform			

INTERESTS

-  **Basketball**
Led team to 3 tournament wins by organizing 8 events during tenure.
-  **Volunteering**
Supported execution of BITSYNC (BITSAA Silicon Valley Chapter), handling logistics and guest coordination for alumni and industry leaders.

CERTIFICATIONS

- AI For Everyone**
DeepLearning.AI

IBM
- The Path To Insights: Data Models And Pipelines**
IBM

EXPERIENCE

Data Analyst Intern

ExcelR

📅 12/2023 - 02/2024 📍 Hyderabad, India

- Built a hybrid (collaborative + content-based) movie recommendation system; achieved 82% accuracy on ground truth
- Performed EDA across 15,000+ data points, driving a 30% lift in click-through rates on personalized suggestions
- Visualized recommendation performance in Power BI for stakeholder reporting
- Web-scraped IMDB with BeautifulSoup

PROJECTS

AWS Streaming Lakehouse (Self-Directed)

📅 04/2026

🔗 <https://github.com/ron0507/aws-streaming-lakehouse>

- Built an end-to-end clickstream lakehouse: Producer Lambda to MSK Serverless (4 topics) to Glue Streaming to S3 Raw to Glue Batch ETL to S3 Curated (Iceberg) to MWAA workflow to Athena.
- Provisioned MSK Serverless clusters with IAM/SASL authentication, multi-AZ VPC networking, KMS encryption, and full infrastructure-as-code via Terraform.
- Implemented Apache Iceberg curated tables with date-based partitioning for an ACID-compliant analytics layer queryable through Athena.
- Authored MWAA Serverless workflows to orchestrate Glue crawlers, batch ETL, and Athena validation steps.
